The "Tour" is a tour of ISO Standard C++, rather than a tour of what's new in C++11 or a tour of your favorite C++ implementation. Also, the tour assumes some familiarity with programming; it is not written for complete novices. Constructive feedback is most welcome. - Bjarne Stroustrup (November 2012)

A concise introduction to C++ and its standard library. In my opinion, it is well suited to: - those who come from C *and* know at least one OO programming language; - those who haven't used C++ in a while, and need to refresh or re-learn it, and also want to get up-to-speed with version 2011 of the language.

A Tour of C++ - I Programmer

After the tour, the real exploration can begin. 2.2 The Basics[tour1.basics]

C++ is a compiled language. That means that for a program to run, its source text has to be processed by a compiler, producing object files, which are combined by a linker yielding an executable program. A C++ program typically consists of many source code files
