The online math tests and quizzes about solving linear equations, involving brackets, fractions and decimals.

Math tests and quizzes on solving linear equations. Equations can sometimes be solved by inspection (working out the answer mentally). This method usually works for simple equations only. The aim when solving an equation is to get one of the variables on its own, on one side of the equation. To remove a term from one side of an equation, carry out the opposite operation to both sides of the ...

BestMaths

A common inequality question tested in Year 9 is ordering the values in ascending or descending order. These questions will require you to compare the value of numbers in different forms (decimals, fractions, index notation etc.) and order them in increasing (ascending) or decreasing (descending) order.
